

# Next Generation Compliance and Big Data

1

***Environmental Law Institute  
Big Data Conference***

***Washington, DC  
October 22, 2013***

# Challenges

2

- Widespread noncompliance among largest sources
  - Major air sources like power plants and refineries
  - Water pollution discharges
  - Mineral processing
  
- New environmental challenges – dispersed sources
  
- Budgets declining

# Tough Enforcement

3

- Tough civil and criminal enforcement for violations that threaten communities and the environment
  - Consequences for violations
  - Deterrence
  - Level playing field
- Enforcement alone is not the answer
- How can we reduce pollution and improve compliance in time of declining budgets?

*The agency says the City of Industry engine certification company used false or incomplete data to help its clients import recreational vehicles.*

# New Approach: Next Generation Compliance

4

# Next Generation Compliance – What is it?

5

1. More effective rules
2. Advanced monitoring technology
3. Electronic reporting
4. Increased transparency
5. Innovative enforcement

*GMAP (geospatial measure of air pollution) tool can be used to estimate amount and location of methane and VOC emissions. Includes IR camera, sampling ports, GPS, methane meter.*

# 1. More Effective Rules

6

## Rules structured to promote compliance

- Simplicity
- Designed to make compliance the default
- Market mechanisms – efficiency and clarity
- Transparency as accountability tool
- Self and third-party certifications

# More Effective Rules

7

## New proposed air rule for oil and gas exploration

- Manufacturers of pollution controls test and submit proof of certification to EPA
- Operators not required to conduct initial performance tests if they purchase a certified combustor
- Similar to IRS model for salary dividend interest income dual reporting

## 2. Advanced Monitoring Technologies

8

- Real-time monitoring – knowing about pollution as it's happening
- Facility feedback loops – preventing pollution before it happens
- Fenceline monitoring
- Community monitoring
- Remote sensing

Monitoring buoy in Charles River collects and transmits data

# Advanced Monitoring

9

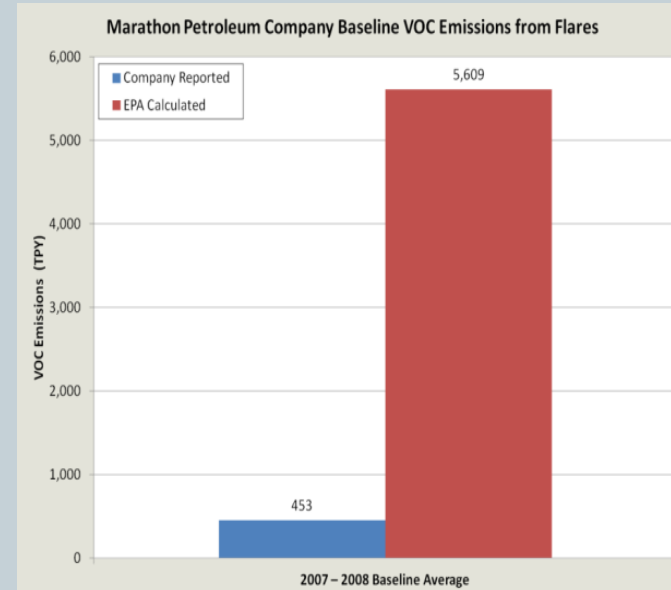

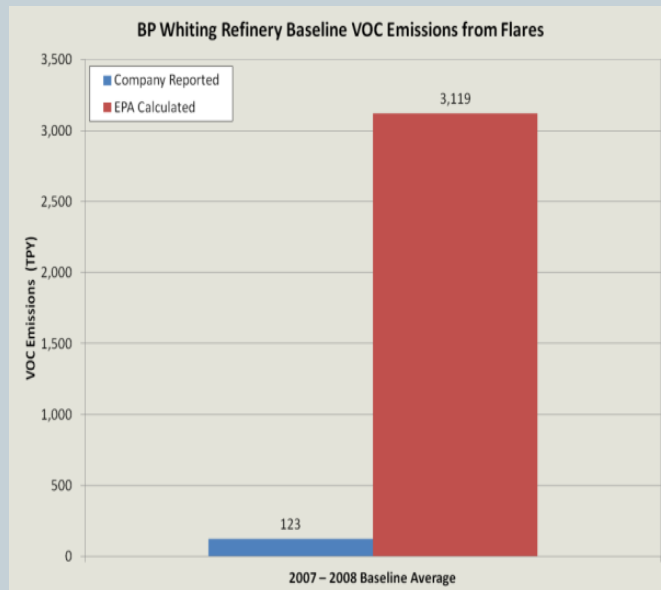

Making the invisible visible

# Advanced Monitoring

10

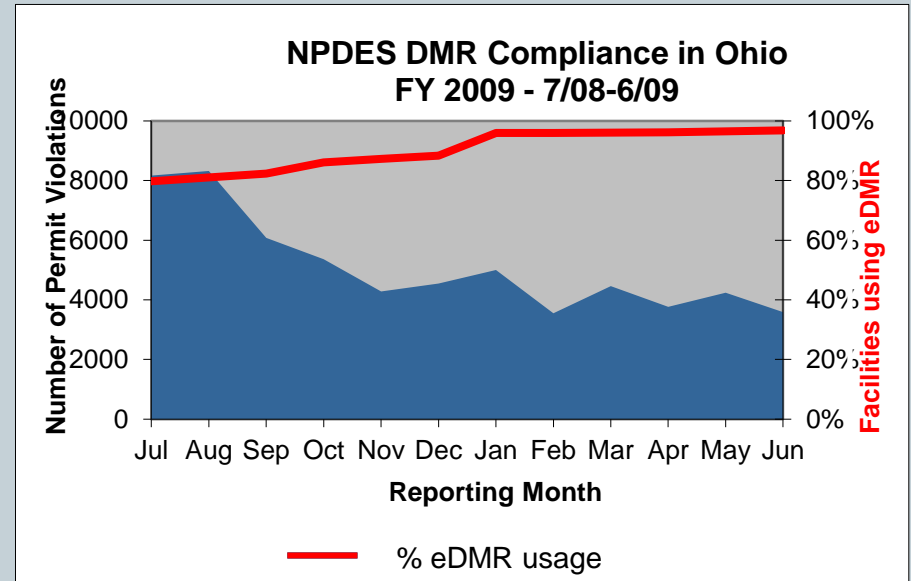

## An example from flaring enforcement

# 3. Electronic Reporting

11

- Information technologies make new solutions possible
- Smart tools and two-way communication
- Private sector reporting tools
- NPDES e-reporting rule proposed on July 30

# 21<sup>st</sup> Century Enforcement

12

Using social media to protect communities

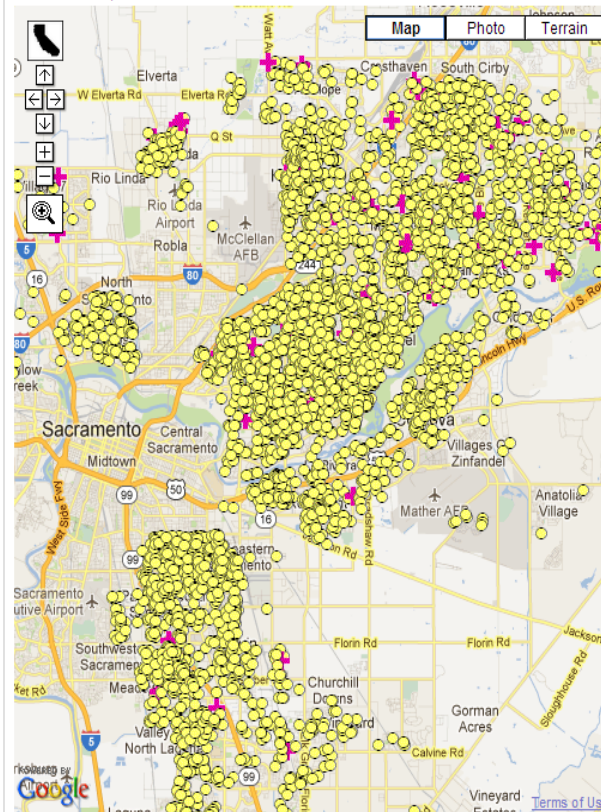

# 4. Increased Transparency

13

- Public accountability drives better performance
- As people pay more attention to data, its quality and accuracy tend to improve

## SANITARY SEWER OVERFLOWS: 10/13/2009 - 02/13/2013

Spill type: + [Category 1](#) o [Category 2](#)  
Click on a map icon for incident information.

*Note: Map does not include spills from sewage treatment plants.*

# Increased Transparency

14

- Evidence that effective transparency drives performance
- SDWA Consumer Confidence Reports
- Restaurant health inspection grades

## 5. Innovative Enforcement

15

Include Next Gen ideas in settlements

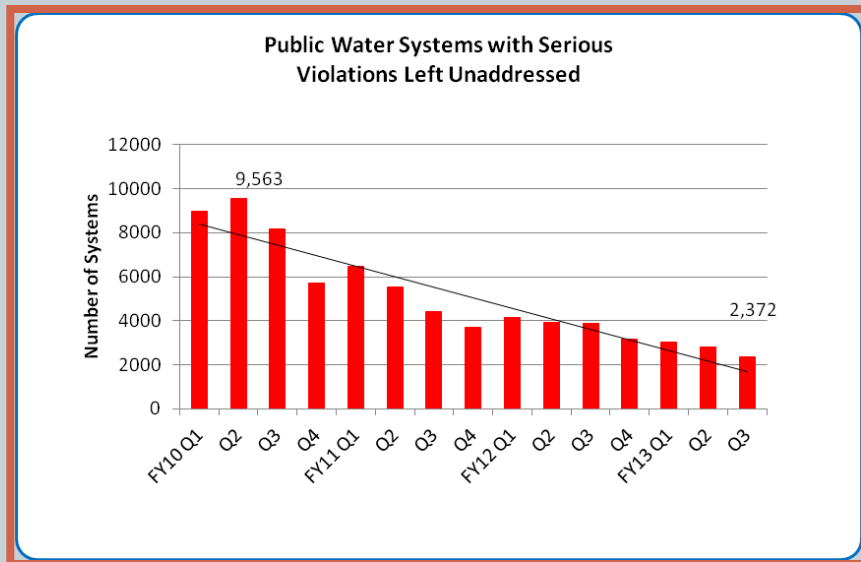

- Fence line monitors (advanced monitoring)
- Electronic reporting under consent decree (e-reporting)
- Public posting of compliance and pollution data (transparency)

# Innovative Enforcement

16

## Drinking water serious violations

- New scoring system
- New enforcement strategy → return to compliance in six months or face enforcement
- 74% reduction in serious violators in three years

# Big Data and Compliance

17

- Our goal: reduce pollution, improve compliance
- Data → actionable information
- Big data: a tool, not a goal

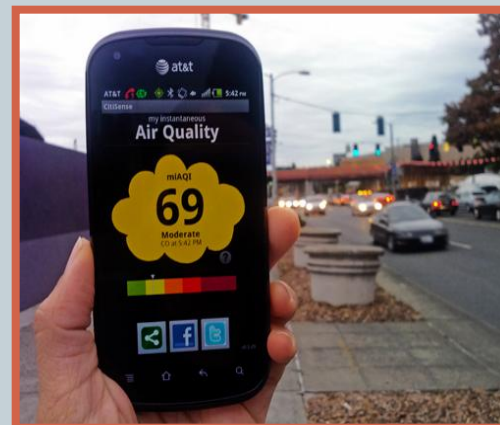

# Big Data: Where Can it Help?

18

## Advanced monitoring

- Direct monitoring of pollution by companies
- Make invisible pollution visible
- Citizen monitoring combined with IT
- Environmental Justice: protecting overburdened communities

[http://ucsdnews.ucsd.edu/pressrelease/small\\_portable\\_sensors\\_allow\\_users\\_to\\_monitor\\_exposure\\_to\\_pollution\\_on\\_their](http://ucsdnews.ucsd.edu/pressrelease/small_portable_sensors_allow_users_to_monitor_exposure_to_pollution_on_their)

# Big Data: Where Can it Help?

19

## Electronic reporting

- We hold these truths to be self evident
- e-reporting now the default for new EPA rules

# Big Data: Where Can it Help?

20

## Improved transparency

- Relevant information
- Communicated directly to people who will use it
- Neighbors, investors, insurers
- Big data available to intermediaries who can translate/develop apps

EPA Village  
Green Project

<http://villagegreen.epa.gov/>

# Big Data: Where Can it Help?

21

## Using data analytics to find problems – Examples:

- Credit card theft
  - Using data to detect fraud
- NYC fire prevention
  - Predicting fire risk from data on illegal conversions

## Better targeting

- Compare multiple data sets
- Not just environmental data
- Data analytics to find serious violations

# Partnership With States

22

- Joint federal/state environmental protection enterprise with shared objectives
- Data interface and compatibility essential
- E-Enterprise for the Environment and Next Generation Compliance

# Big Data Has Big Potential

23

- Opportunity for dramatic gains in environmental and health protection
- Public access to data will happen with government or without; let's lead
- Embrace new approaches

BUT

- Focus on what advances mission
- Careful design required; rely on evidence for what works
