

Tom Brosnan is a supervisory environmental scientist who is currently a Communications Manager within NOAA's Office of Response and Restoration (OR&R).

From 1999-2008 he was a staff scientist and then the Northeast and Great Lakes Branch Chief for NOAA's Assessment and Restoration Division, where he oversaw and participated in natural resource damage assessments of many waste sites and oil spills.

Prior to NOAA he was the Watershed Management Program Manager at the ILSI Risk Science Institute, convening expert panels on watershed management, pesticides in drinking water, and catastrophic threats to water supplies.

From 1986-1996, he was the Chief of the Marine Sciences Section at the New York City Department of Environmental Protection, where he conducted a long-term water and sediment monitoring program in NY/NJ Harbor.

He received his B.S in biology from Fordham University, NY and an M.S. in limnology/lake restoration from Kent State University, OH.
