

# Overview of where we are at since the signing of LCSA

Steve Bennett, SVP, Scientific Affairs  
Household & Commercial Products Association

# Why did LCSA happen?

- “Over 80,000 chemicals in commerce, many untested”
- Lack of Confidence
- Significant retailer and state activity

# Implementation of LCSA

- Framework rules
  - Inventory Active/Inactive Rule
  - Prioritization Rule
  - Risk Evaluation Rule
  - Fees Rule
- New Chemicals
  - Assertive Finding
  - Transparency Efforts
  - Alternatives to Animal Testing
- Ongoing Section 6 Rule makings
  - Methylene Chloride Ban on Paint and Coating Removal for Consumer Use
- First 10 chemicals
  - All Problem Formulations released on time
  - Pigment Violet 29 – first draft risk evaluation
  - Nine more before December
- Science Advisory Committee on Chemicals (SACC)

# Has LCSA Restored Confidence?

- Around 40,000 chemicals currently in commerce, 10 under risk evaluation
- Some areas of improvement
- Other areas unclear (or not yet?)
- Pace of retailer and state activity has not slowed

# Introduce Co-Panelists

- Bios
