Data Management Training 2017

Data Systems and Data are 'in-line' with the process and part of the process

In 2018 ATTAINS is <u>THE</u> way to submit IR data to EPA

We'll start working with states in June to begin transitioning to the new ATTAINS

- Start thinking about what your starting point is

Am I an Exchange Network State or User Interface State?

Do I have GIS for my Assessment Units?

ATTAINS List Serve

How do we keep this discussion going?

States are doing amazing things!

Where will we be 2 years from now?

Where will be 4-5 years from now?

Set ~~realistic~~ goals…..

Figure out who your local/state agency resources are for GIS and IT, both in and available to your agency.

Figure out the strengths and weaknesses of your current system, and prioritize your needs into bites, snacks, and meals. Plan ahead!!

Figure out your best state and EPA resources, and don't be shy to reach out to them.

Make the leap into 'Open Source'

And now……

A send-off story
