

**US Army Corps  
of Engineers®**

## **Justin Elkins**

Mitigation Subject Matter Expert (SME)  
Huntington District,  
Regulatory Division

Justin Elkins currently serves as the Mitigation SME providing support, advice, and counsel to the District on Mitigation issues and acts as principle scientific contact for Corps staff as well as other non-Corps customers on complex Mitigation consultations, processes, and programs. Justin serves as District liaison with internal technical counterparts at other federal agencies as well as external stakeholders and other scientific/resource management entities. Justin is Lead Instructor for Regulatory Mitigation courses training cadre and serves as a Technical Lead for the Regulatory Request System development. Previously, he spent seven years as Lead Regulatory Project Manager at the District responsible for managing the compensatory mitigation program (mitigation banks, in-lieu fee). He received an M.S. in Physical Science - Geobiophysical Modeling and a B.S. in Environmental Science from Marshall University.
